

Eview Personal Alarm SMS Protocol

Date: Apr.-18-2023

Abstract

This document, first of all, provides a quick start list, selecting the most frequently used SMS commands, to help you do the very first sample test.

Secondly, the chapter "general SMS commands" gives the most details respect to each command, in 4 parts, structure, explanations, example, and reply. With a full comprehension of these, you can configure the device in a highly flexible way, as well as to receive relevant Information from it.

In the third section, you can find some particular commands for some product models, not compatible in the others. This difference comes from that in capability of these models.

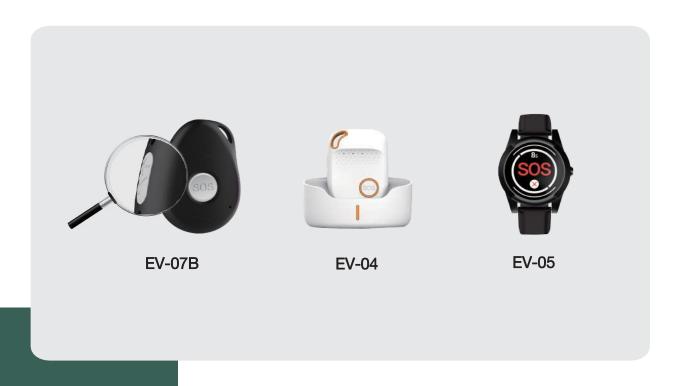

Last but not the least, some information about working mode and functions are displayed as appendix.

Important to note

- There should be no space "" in any command;
- Comma "," is obligatory as indicated;
- Both capital letter (ABC) and lower-case one (abc) work;
- Please check the SIM card status, if you did not receive any SMS reply from device;
- There are probably some hidden commands, please consult the sales;
- There are some particular sim cards that don't support SMS, like some IOT, or GPRS-only cards. Please confirm with your SIM card provider;
- In some cases, one long SMS (>150 bytes) can be split into two ones, thus possibly disabling the map link. Please consult your SIM card provider.
- In every section, you can come back to catalog by clicking "back to catalog";

It's compatible for:

Catalog

1. Most Frequently used SMS Commands (Quick Start List

Item	Command Structure	Command Example
Set Contact Numbers	A1,1,1,(phone number)	A1,1,1,123456789
Set SMS Password	P(password)	P123456
Request Location	loc	loc
Wi-Fi ON/OFF	Wifi(0=off, 1=on)	Wifi1
Microphone Volume	Micvolume(volume)	Micvolume10
Speaker Volume	Speakervolume(volume)	Speakervolume90
Prefix	Prefix(0=off, 1=on),(prefix name)	prefix1,Emma
Check Battery Status	battery	battery
Fall Down Alarm	fl(0=off, 1=on),(sensitivity1-9),(0=no call,	£14 E 4
Fall Down Alarm	1=call)	fl1,5,1
No Motion Alarm	nmo(0=off, 1=on),(no motion time), (0=no call, 1=call)	NMO1,80M,1
APN	S(0=no call, 1=call),(apn)	S1,internet
Server	IP(0=no call, 1=call),(server IP),(port number)	IP1,www.smart-locator.com,6060
GPRS	S(0=of,2=on)	S2
	Mode1	mode1
	Mode2,(motion interval),(no motion interval)	mode2,03M,01h
Mauline Mada	Mode3,(interval)	mode3,01H
Working Mode	Mode4,(interval)	mode4,30m
	Mode5,(interval)	mode5,10h
	Mode6,(motion interval),(no motion interval)	Mode6,03M,01h
Continuous Locate	CL(interval),(duration)	CL10s,600s
Check Function Settings	status	status

2. General SMS Commands

The general SMS commands are compatible for product models EV-07B series, EV-04, EV-05.

G.1 Contact Numbers

Setting contact numbers is the very first step for the device to work. This contact number list is the foundation for all the functions related to calling and sending SMS: SOS, fall down alarm, tilt alarm, no motion alarm, whitelist, etc.

1. Contact Numbers			
1.1 Set Contact No	1.1 Set Contact Numbers		
Structure	A(n),(SMS Yes/No),(call Yes/No),(phone number)		
	(n)	Value range: 1~10 Contact number sequence	
	(SMS Yes/No)	Value range: 0~1 0 - Do not receive SMS when there is an alarm 1 - Receive SMS when there is an alarm	
Explanation	(call Yes/No)	Value range: 0~1 0 - Do not receive Call when there is an alarm 1 - Receive Call when there is an alarm	
	(phone number)	Mobile number or Landline.	
Example	A1,1,1,123456789		
Reply	Set contact number 1 ok.		
1.2 Check Contact	t Numbers		
Structure	A?		

	energia en
Explanation	To check the current status of contact number list
Example	A?
Reply	A1: 1,1,15899795842 A2: 1,0,13632770106 A3: 0,1,15986236978
1.3 Remove Contact Numbers	
Structure	removeA(n)
Explanation	To remove contact number "n" Value range: 1~10
Example	removeA5
Reply	Contact number 5 removed.

G.2 Password

- With this command sent, a password will be required in head of all commands. For example:
 321654Loc, 321654A1.
- The preset password won't be erased by changing a new sim card.
- Be sure to remember the new password, otherwise, you must ask your distributor to reset to factory settings in case the password forgotten.
- Make sure the password is of 6 digits, if not the tracker cannot recognize the password.

2. Password		
2.1 Set Password		
Structure	P(password)	
Example	P321654 Password must be 6 digital numbers and the first bit cannot be "0"	
Reply	Set password ok.	
2.2 Change Password		
Structure	(old password)P(new password)	
Example	321654P123456	
Reply	Your password has been changed successfully.	
2.3 Delete Password		
Structure	(password)P0	
Explanation	<pwd> Your current password.</pwd>	
Example	123456P0	
Reply	Password deleted successfully.	

G.3 SMS White List

Device will receive SMS only from contact numbers on Whitelist.

3. SMS Whitelist		
Structure	sms(n)	
Explanation	0=whitelist off, 1=whitelist on	
Example	sms0	
Reply	Allow device to receive text message from all numbers.	
Example	sms1	
Reply	Allow device to receive text message only from authorized numbers.	

G.4 SOS Alarm Settings

To set the way to activate the SOS, ring time and talk time.

N means N*0.1 second. (20 means 20*0.1 seconds= 2 seconds)

4. SOS Alarm Settings			
4.1 SOS Button			
Structure	SOS(mode),(time)		
Explanation	(mode)	1=long press, 2=double click	
Explanation	(time)	(Value range: 1~100)*0.1 second	
Example	SOS1,20		
Reply	Set long press 2 seconds ok.		
It means long pres	ss 2 seconds to trigger SOS alarm		
Example	SOS2,20		
Reply	Set double click 2 seconds ok.		
Double click SOS	button in 2 seconds to trigger SO	S alarm	
4.2 SOS Alarm F	Ring Time and Talk Time		
Structure	soscall(ring time),(talk time)		
Evolunation	Ring time means ringing maxima Value range: 1~60 seconds	lly for xxx seconds, then call to next contact number	
Explanation	Talk time is the maximal time to talk during a call Value range: 0~65535 seconds		
Example	Soscall35S,20m		
S=seconds, m=minutes, h=hours			
Reply	Set ring time 35 seconds, talk time 20 minutes ok.		
4.3 SOS Call Loops			
Structure	Loop(time)		

•	Charlett Eview di C reciniciogy
	Value range: 0~10 loop means SOS calling cycles to all authorized number
Explanation	0=infinite loop
	1=only once
Example	Loop5
Reply	Set SOS loop 5 times ok.

Back to Catalog

G.5 Request Location

After sending LOC, the device will be looking for the signal of Bluetooth, Wi-Fi and GPS, if the Bluetooth location is fixed, the device will stop searching for Wi-Fi and GPS signals.

5. Request Location			
5.1 Location	5.1 Location		
Structure	Loc		
Example Reply	GPS Loc! Now: Loc Time:07/04/2021 17:36:44 Speed:0km/h Altitude:97.0 Battery:57% www.google.com/maps?q=22.6537233,114.0006070		
5.2 GPS Location (EV-0	7B only)		
Structure	Loc,gps		
Explanation	The device will be only looking for the GPS signal. The device only searches GPS location for a maximum of 3 minutes, if up to date GPS location is not available, the device will reply last known GPS location.		

G.6 Bluetooth

The device will not be looking for Bluetooth location if BLE0 is set. You can turn on or off the Bluetooth positioning. Setting the location coordinates for the charging base is the very first step to using the charging base.

6. Bluetooth		
6.1 Keep Device Connected to Charging Base via Bluetooth (EV-07B only)		
Structure	BK(n)	
Explanation	0=not always connected, 1=always connected	
Example	ВКО	
Reply	Stay Connection off.	
If the setting is BK0, the device will not stay connected to the charging base, even when the device is in the range of docking.		
6.2 Set Coordinates for Charging Base (EV-07B and EV-04)		
Structure	BL(latitude),(longtitude)	
Example	BL22.6180000,114.0360000	
Reply	Set BLE location ok.	
6.3 Turn on/off Bluetooth Location		
Structure	BLE(n)	
Explanation	1=on, 0=off	
Example	BLE0	
Reply	BLE loc off.	

G.7 Wi-Fi

To turn on/off Wi-Fi. It will detect Wi-Fi hot spot and transfers those MAC address to coordinates. Users will receive Wi-Fi location if GPS location is not available.

7. Wi-Fi		
7.1 Turn on/off Wi-Fi		
Structure	Wifi(n)	
Explanation	0=off, 1=on	
Example	Wifi0	
Reply	WiFi off.	
7.2 Set Map Link for Wi-	-Fi	
Structure	WIFIURL(http)/web/geolocation/%s/%s	
Explanation	Change Wi-Fi format when necessary. Note: Please ask your agent before making any changes	
Example	WIFIURLtracking.com/web/geolocation/%s/%s	
Reply	WIFIURL Set ok.	

G.8 LBS

To turn on/off LBS. LBS location is fixed based on the cell-towers data which is received from device. Usually, the device will find the nearest cell tower and will show its location near it. However, the LBS location provided by the device is usually much less accurate than other location methods. (when there is no GPS data, Wi-Fi or BLE, the system uses LBS as a backup.)

8. LBS	
7.1 Turn on/off LBS	
Structure	LBS(n)
Explanation	0=off, 1=on
Example	lbs0
Reply	lbs off.

Back to Catalog

G.9 AGPS

Assisted GPS is a system that is often able to significantly improve startup performance or time-to-first-fix and improve the GPS location to be more precise. GPS will search for the location, starting from the area around this point, thus improving efficiency to provide location information.

9. AGPS		
9.1 Turn on/off AGPS		
Structure	Agps(n)	
Explanation	0=off, 1=on	
Example	Agps0	
Reply	Agps off.	
9.2 Set AGPS Coordinates		
Structure	Agpsloc(n),(latitude,longtitude)	
Explanation	n=0, Do not Allow GPS to update coordinates from time to time.	

	Charletter Eview and Technology
	n=1, Allow GPS to update coordinates from time to time.
Example	agpsloc1,114.1234567,22.1234568
Reply	AGPS Loc set ok.
9.3 Check AGPS settings	
Structure	Agpsloc?
Reply	AGPS Loc 1,1141234567,221234568.

G.10 Side Buttons

Support EV-07B and EV-04.

10. Side Buttons		
10.1 Upper Button		
Structure	X(n),(time)	
Explanation	n=0	Upper button does not call
	n=1-10	To call contact number n
	time	(Value range: 1~100)*0.1 second. For example, 20=long press 2 seconds
Example	X2,20	
Reply	Set to dial the A2 ok.	
10.2 Lower Button		
Explanation of functions (no SMS commands)		
Function 1	Double click the button to turn on/off voice prompts.	
Function 2	Press and hold button 3 seconds, and at the same time press the CALL2 button on the charging base, then the device and charging base will pair to each other via Bluetooth.	

G.11 Vibration

11. Vibration		
Structure	Vibrate(n)	
Explanation	n=0, vibration off	
	n=1, vibrate when user push SOS button, tilt alarm, fall alarm, incoming call, press side button, turn on/off device.	
Example	Vibrate0	
Reply	Vibration Off!	

Back to Catalog

G.12 Beep

This command is to control all the voice prompts on/off made by SOS, tilt, fall, motion alarms and other voice warnings.

12. Beep	
Structure	Beep(n)
Explanation	n=0, beep off
	n=1, vibrate when user push SOS button, tilt alarm, fall alarm, incoming call, press side button, turn on/off device.
Example	Beep0
Reply	Beep Off!

G.13 Call

To set rules in calling and answering calls.

13. Call			
13.1 Incoming Call	13.1 Incoming Call		
Structure	callin(n)		
	n=0, All numbers can call in		
Explanation	n=1, Only authorized numbers can call in		
	To decide who can call the device		
Example	callin0		
Reply	Allow all numbers to call in.		
13.2 Answering the Incoming Call			
Structure	Answer(n),(time)		
	n=0, automatic answering the call		
	n=1, press any button to answer the call		
Explanation	Value range: 1~10 seconds automatic answering the call after how many seconds ringing.		
	The way to answer the incoming call.		
Example	Answer0,5		
Reply	Set automatic answering call ok.		
Example	Answer1		
Reply	Set to press the button to answer the call ok.		
13.3 Hang up the Ca	all		
Structure	Hangup(n)		
Explanation	n=0, users cannot hang up on their own		
	n=1, user can hang up the call by press SOS button		
	The way to hang up the call		
Example	Hangup0		

Connect	Sherizhen Eview GPS Technology
Reply	Set hangup0 ok.
13.4 Call Back	
Structure	Callback(phone number)
Explanation	Device will call the set number immediately after the message is sent.
Example	Callback123456789
Reply	call 123456789 ok.
13.5 Stop call sequence	
Structure	scs(n)
Explanation	When a call is connected, it will not call the next contact
Example	scs1
Reply	Stop calling sequence set OK!
Example	scs0
Reply	Allow calling sequence set OK!
13.6 Stop call immediately (EV-04 only)	
Structure	stopcall
Example	stopcall
Reply	Stop success!

G.14 Voice Volume

To set the volume of incoming call ringtone, microphone, speaker, and voice prompts. Speaker can be turned on and off for SOS call, and call through the side upper button.

14. Volume		
14.1 Incoming Call Ringtone Volume		
Structure	RT(level)	
Evalenation	Volume range: 0~100	
Explanation	Volume adjustment for a ringtone	
Example	RT50	
Reply	Set ringtone volume 50 ok. (incoming call)	
14.2 Microphone Volume		
Structure	Micvolume(level)	
Explanation	Volume range: 0~15	
Explanation	Microphone volume adjustment for two-way talking	
Example	Micvolume10	
Reply	Set microphone volume 10 ok.	
14.3 Speaker Volume		
Structure	speakervolume(level)	
	Volume range: 0~100	
Explanation	Speaker volume adjustment for two-way talking	
Example	Speakervolume90	
Reply	Set speaker volume 90 ok.	
14.4 Voice Volume		
Structure	voice(level)	
Explanation	Volume range: 0~100	
Example	voice90	
Reply	Set voice prompt volume 90 ok.	
14.5 SOS Speaker Switch		
Structure	sosspeaker(n)	
Explanation	n=0, turn off speaker	

Sherizhen Eview di 3 rechnology
n=1, turn on speaker
The speaker can be turned on/off if the call made by SOS alarm.
Sosspeaker1
Turn on speaker ok. (SOS call)
vitch
Xspeaker(n)
n=0, turn off speaker
n=1, turn on speaker
The speaker can be turned on/off if the call made by CALL button
xspeaker0
Turn off speaker ok. (call button)

Back to Catalog

G.15 LED

Support EV-07B and EV-04.

15. LED	
Structure	led(n)
Explanation	n=0, turn off LED
	n=1, turn on LED
Example	LED0
Reply	LED off.

G.16 Time Zone

The device clock time depends on the time zone, related to the time report, alarm clock, alarm time, location time, etc.

16. Time Zone		
Structure	TZ(time zone code):(minute)	
Explanation	Value range: +00 ~ +14, -00 ~ -14	
	Minute=0/15/30/45	
Example	tz+1	
Reply	Set time zone +1 ok.	
Example	tz+10:15	
Reply	Set time zone +10:15 ok.	

Back to Catalog

G.17 Prefix

To identify the device name, when receiving SMS messages from device.

17. Prefix		
Structure	Prefix(n),(text)	
Explanation	n=0, prefix off	
	n=1, prefix on	
	Text=prefix context Value range: maximum characters can be 100.	
Example	Prefix1,Emma	
Reply	Set Emma ok.	

G.18 Battery

To set (up to 2) low battery alarms, and to check the battery status.

18. Battery		
18.1 Low Battery Aları	m	
Structure	Low(n),(level)	
	n=0, low power alarm off	
Explanation	n=1, low power alarm on	
	Value range: 0~100	
Example	Low1,15	
Reply	Set low power alarm 15% ok.	
18.2 Low Battery Alar	m Voice (EV-07B only)	
Structure	Lowuser(n),(level)	
	n=0, low power alarm voice off	
Explanation	n=1, low power alarm voice on	
	Value range: 0~100	
Example	Lowuser1,20	
Reply	y Set low power alarm 20% ok.	
18.3 Battery Status		
Structure	battery	
Reply	Battery: 88%	

G.19 Find My Device

After the text message "findme" is sent to the device, device will play voice prompt "I am here" and last for 30 seconds, the voice prompt can be stopped by pressing the button when device is found.

	19. Find My Device
Structure	findme
Reply	(no reply)

G.20 Turn off Device

	20. Turn off
Structure	off
Reply	(no reply)

G.21 Device Information

To request information respect to IMEI, firmware version, device version.

21. Device Information			
Structure V?			
Reply Example	IMEI:863921033969786 GSM signal quality: 15 Software version: V07BX.8601.2109 version: V1.0.29.1		

G.22 Alarms

SOS, Fall down alarm, Geo-fence alarm, Motion alarm, Tilt alarm, No motion alarm, Over-speed alarm.

22. Alarms			
22.1 SOS Emergency	22.1 SOS Emergency Alarm		
Structure	(no command)		
Alarm Example	Help Me GPS Loc! Now: Loc Time:01/09/2021 09:46:51 Alarm Time:01/09/2021 09:46:33 Speed:0km/h Altitude:85.1 Battery:100% www.google.com/maps?q=22.6537455,114.0005853		
22.2 Fall Down Alarm			
Structure	fl(n),(sensitivity level),(call yes/n	0)	
	n=0	Fall alarm off	
	n=1	Fall alarm on	
Explanation	sensitivity level	1-9. 1=least sentible, 9=most sensible	
	call yes/no	Value range: 0~1 0 – Do not receive a call when there is an alarm 1 – Receive call when there is an alarm	
Example	FL1,1,1		
Reply	Set fall down alarm ok!		

Alarm Example	Now: Loc Time:26/08/2021 11:23:55 Alarm Time:26/08/2021 11:23:48 Speed:0km/h Altitude:77.6 Battery:100% www.google.com/maps?q=22.6536771,114.0004660		
22.3 Geo Fence Alarm			
Structure	Geo(n),(on/off),(leave/enter),(distance)		
	n	Geo fence number value range: 1~4	
Familian	On/off	0=off, 1=on	
Explanation	Leave/enter	0=leave, 1=enter	
	Distance	Value range: 100~65535 meters	
Suggestion	The distance should be no less than 100 meters		
Example	Geo1,1,0,100m	Geo1,1,0,100m	
Reply	Set geo fence 1 in, 100 M radiu	s ok.	
Alarm Example	Geo Fence alarm 1 i GPS Loc! Now: Loc Time:28/08/2021 08:40:17 Alarm Time:28/08/2021 08:40:17 Speed:1km/h Altitude:114.7 Battery:97% www.google.com/maps?q=22.6583923,114.0004503		

22.4 No Motion Alarm		
Structure	nmo(n),(static time),(call Yes/No)	
Explanation	n	0=off, 1=on
	Static time	Value range: 60~36000 seconds
	S=seconds, M=minutes, H=hours	
	Call yes/no	0=no, 1=yes
Example	NMO1,80M,1	

If device doesn't move (no motion) for 80 minutes, in 81 minutes, no motion alarm will be activated, device will send a text message or make a call immediately.

Reply	Set no motion alarm 1 hour 20 minutes ok.	
Alarm Example	No Motion Alarm! GPS Loc! Now: Loc Time:01/09/2021 18:08:39 Alarm Time:01/09/2021 18:08:39 Speed:1km/h Altitude:86.3 Battery:76% www.google.com/maps?q=22.6536985,114.0005760	

22.5 Motion Alarm

Structure	Mo(n),(static time),(duration time),(call Yes/No)	
	n	0=off, 1=on
	Static time	Value range: 60~36000 seconds
Explanation	Duration time	Value range: 60~36000 seconds
	S=seconds,M=minutes, H=ho	urs
	Call Yes/no	0=no, 1=yes
Example	mo1,05m,03s,1	
Reply	Set motion alarm ok.	
Motion for 3 secon	nds after staying no motion for	more than 5 minutes
Alarm Example	Motion Alert!3 seconds! GSM and WIFI-Loc: Loc Time:23/06/2021 17:25:12 Alarm Time:23/06/2021 17:24:45 Battery:100% smart-locator.com/web/geolocation/wg/YyK9- tAnYQQ4qaitPcGApKME07W3gZyqiPhyeFiwo2A6fBzFSalQK3MGyxGs8JK02afBqfCSt Ny9ma5 UdZU3SAexSA7s8OQ2pUAxPPdb_ryoFU3X96asZG6XwxLHpMCl3TofygspzAEBBT0IK cEeBg==	

22.6 Tilt Alarm		
Structure	Tilt(n),(degree),(duration time),(call Yes/No)	
Explanation	n	0=off, 1=on
	Degree	Value range: 30-90
	Duration Time	Value range: 10~3600 seconds
	Call Yes/No	0=no, 1=yes
Example	tilt1,45,30s,1	
Reply	Set tilt alarm 45 degrees ok.	

Device will make a 30 seconds warning beep (20 seconds is fixed, user can't modify the beep time) if the device is detected vertically tilt over 45 degrees and the tilt last for 30 seconds. After 30 seconds beep warning, device will send the alert to contact numbers. or If the device is automatically adjusted to less than 45 degrees before 30 seconds beep finish, the alarm will be automatically canceled.)

	Tilt Alarm
	GPS Loc!
	Now:
	Loc Time:12/08/2021 15:08:55
Alarm Example	Alarm Time:12/08/2021 15:08:55
	Speed:2km/h
	Altitude:97.2
	Battery:100%
	www.google.com/maps?q=22.6538115,114.0006836

22.7 Over Speed Alarm

Structure	Speed(n),(speed)	
Evalenation	n 0=off, 1=on	
Explanation	speed Value range: 20-400 km/h	
Example	Speed0	
Reply	Over speed alarm canceled.	
Example	Speed1,100km/h	
Reply	Set over speed alarm 100km/h ok.	

Connect	Shenzhen Eview GPS Technology		
Alarm Example	Over-speed alarm50km/h Now: Loc Time:13/07/2021 18:44:54 Alarm Time:13/07/2021 18:45:05 Speed:73km/h Altitude:32.1 Battery:100% www.google.com/maps?q=22.6645401,113.9950130		
22.8 Welfare Ala	arm (EV-07B and EV-04)		
Structure	Welfare <n>,<set time="" up="">,<</set></n>	warning time>, <call no="" yes=""></call>	
Description	Checkin: press 2 seconds on the side bottom button to start the timer Checkout: press 2 seconds again on the side bottom button to end the timer		
	n	0=off,1=on	
Explanation	Set up time	Value range: 600~360000 seconds	
Explanation	Warning time	Value range: 120~600 seconds	
	Call Yes/No	0=no,1=yes	
Example	Welfare1,600,120,1		
Reply	Welfare alarm.		
Example	Welfare0	Welfare0	
Reply	Welfare check off.		
Alarm Example	Welfare Alert GSM and WIFI-Loc: Loc Time:23/06/2021 17:25:12 Alarm Time:23/06/2021 17:24:45 Battery:100% smart-locator.com/web/geolocation/wg/YyK9-tAnYQQ4qaitPcGApKME07W3gZyqiPhy eFiwo2A6fBzFSalQK3MGyxGs8JK02afBqfCStNy9ma5UdZU3SAexSA7s8OQ2pUAxPP db_ryoFU3X96asZG6XwxLHpMCl3TofygspzAEBBT0lKcEeBg==		

G.23 Alarm Clock

Device will ring, or play voice prompts, when it's clock time.

23. Alarm Clock		
Structure	CLK(n),(on/off),(time),(type),(date)	
	n	Value range 1~4. Clock number
	On/off	0=off, 1=on
Explanation	time	00:00-24:00
	type	Value range 1~4. Voice/music type
	date	Value range 1~7. Monday to Sunday
Example	CLK1,0	
Reply	Alarm clock 1 off.	
Example	CLK2,1,19:30,3,1,2,4	
Reply	Alarm clock 2 on.	
Clock number2, at 19:30 with alarm type 3, play every Tuesday and Thursday		

Back to Catalog

G.24 No Disturb Time

Device will not make any sound even if someone calls. User will not hear any ringtone when there is an incoming call, and device will not play any voice warnings at all.

24. No Disturb Time		
Structure	ND(n),(start time),(end time)	
	n	0=off, 1=on
Explanation	Start time	Value range: 00:00-24:00
	End time	Value range: 00:00-24:00
Example	ND1,19:00,06:00	
Reply	No disturb from 19:00 to 6:00 ok.	
Example	ND0	
Reply	No disturb off.	

G.25 Internet Setting

To set APN, Heartbeat, Server. Heartbeat only works in mode 1,2,3,6.

25. Internet Setting			
25.1 APN			
Structure	S1,(APN),(username),(password)		
	APN	APN set by particular operators	
Explanation	Username	(sometimes without)	
	Password	(sometimes without)	
- Some APN without user n - Make sure that the SIM ca	To make device online to the platform, the user needs to set up the APN. - Some APN without user name and password, so please leave it blank. - Make sure that the SIM card in the tracker supports the internet function. - The APN can be acquired from your local Telecom operators		
Example	S1,internet		
Reply	Set APN ok.		
25.2 Heartbeat	25.2 Heartbeat		
Structure	GPRSHB(time)		
	Time	Value range: 60~86400 seconds	
Explanation	S=seconds,M=minutes, H=hours		
	Time=0	Heartbeat off	
The heartbeat packet function is used to keep the Transmission Control Protocol (TCP) connection open when the interval of scheduled GPRS reporting is long			
Example	GPRSHB5M		
Reply	Set heartbeat 5 minutes ok.		
25.3 Server IP&Port			
Structure	IP(n),(IP/domain name),(port)		
	n	0=off, 1=on	
Explanation	IP/domain name	Server IP	
	port	Server port	
Example	IP1,www.smart-locator.com,6060		
Reply	Set IP ok.		

Connect	Snenznen Eview GPS Technology	
Example	IPO	
Reply	IP connection disabled.	
25.4 GPRS Connection		
Structure	S(n)	
Evolopation	n=0, GPRS off	
Explanation	n=2, GPRS on	
Example	S2	
Reply	GPRS is connecting.	
25.5 Check GPRS Settin	25.5 Check GPRS Settings	
Structure	GPRS?	
Reply Example	GRPS: ON APN: internet Username: Password: IP: 1, www.smart-locator.com Port: 6060 Move report time: 30 minutes No move report time: 60 minutes HB: on, 20 minutes	

G.26 Working Mode

There are currently 6 working modes. Please check appendix 1 and the document 'Working mode' to know more details.

26. Working Mode		
26.1 Mode 1		
Structure	mode1	
Reply	Set mode 1 ok.	
26.2 Mode 2		
Structure	mode2,(movement time interva	al),(no movement time interval)
Evalenation	movement time interval	Data update interval when moving
Explanation	no movement time interval	Data update interval when not moving
EV-07B and EV-04 v	alue range for 30~86400 second	ds, EV-05 for 60~∞, H=hour, M=minute, S=second
Example	mode2,03M,01h	
Reply	Set mode2, 3 minutes,1 hour of	ok.
26.3 Mode 3		
Structure	Mode3, (time interval)	
Explanation	Time interval	Data update interval when Moving or not moving
EV-07B and EV-04 value range for 30~86400 seconds, EV-05 for 60~∞, H=hour, M=minute, S=second		
Example	mode3,01H	
Reply	Set mode3, 1 hour ok.	
26.4 Mode 4	26.4 Mode 4	
Structure	Mode4, (time interval)	
Explanation	Time interval	Data update interval when Moving or not moving
EV-07B and EV-04 v	EV-07B and EV-04 value range for 60~604800 seconds, EV-05 for 60~∞, H=hour, M=minute, S=second	
Example	mode4,30m	
Reply	Set mode4, 30 minutes ok.	
26.5 Mode 5		
Structure	mode5, (time interval)	
Explanation	Time interval	Data update interval when Moving or not moving
EV-07B and EV-04 v	alue range for 1200~604800 sec	conds, EV-05 for 60~∞, H=hour, M=minute, S=second
Example	mode5,10h	

Reply	Set mode5, 10 hours ok.	
26.6 Mode 6		
(Same as mode 2)		

Back to Catalog

G.27 Continuous Locate

Continuous locate function will be activated automatically in case of SOS alarm, to track continuously according to a certain interval during several minutes.

27. Continuous Locate		
Structure	CL(report interval),(duration time)	
Explanation	report interval	Value range: 10~600 seconds
	duration time	Value range: 60~1800 seconds
H=hour, M=minute, S=second		
Example	CL10S,600S	
Reply	Set live tracking every 10 seconds and last for 10 minutes ok.	

Back to Catalog

G.28 Stop Sending Stored Historical Data to Server

28. Stop Sending Historical Data to the Server	
Structure	flush
Reply	Flush ok!

G.29 Check Function Settings

Check the current settings.

29. Check Settings	
Structure	status
Reply	Mode:4,0 second LED: on Beep: on Vibration: on Time zone: +10:00 GEO Fence:0,0,0,0 Motion alarm: off No Motion alarm: off Tilt alert: off Fall alarm: on, level:5 Low power alarm: on,15% SOS Call:10 minutes, loop:1

Back to Catalog

G.30 Set GPS Map Link

To change GPS map link format when necessary.

30. Set GPS Map Link	
Structure	GPSURLwww.google.com/maps?q=%.7f,%.7f
Reply GPSURL Set ok.	

Back to Catalog

G.31 Beacon

To set, add, delete and check Beacon list. To set Beacon leave home alert.

31. Beacon		
31.1 Delete Beacon List		
Structure	BCD	
Reply	Delete beacon list successfully.	
31.2 Automatically Add Beacon List		
Structure	BCA(coordinates),(location name)	
Explanation	coordinates	latitude,longitude
	location name	For example, home, office, garden
To automatically add Beacons nearby, with RSSI > -60		
Example	BCA 22.6535181,114.0009472,office	
Reply	Add successfully Beacon (mac address).	
31.3 Set Beacon List		
Structure	BCS(coordinates),(mac1),(location name1);(mac2),(location name2);	
Explanation	coordinates	latitude,longitude
	mac	Beacon mac address
	Location name	For example, home, office, garden
You can set only one location in one command, and you can set more than one beacon for one location.		
Example	BCS22.6535181,114.0009472,f7:37:b7:10:81:ce,room1;E6:6F:80:A9:61:5D,room2	
Reply	Beacon list set OK.	
31.4 Check Beacon List		
Structure	BCQ(n)	
Explanation	n	Check from Beacon (n)
Example	BCQ1	

Connect		Shenzhen Eview GPS Technology
Reply	1,F7:37:B7:10:81:CE,office1 2,C4:9F:A6:15:24:3F,office2 3,D3:E3:AC:86:5E:46,office7 4,DF:19:ED:B3:63:4C,room1 5,DF:79:14:AF:36:87,room9 6,EA:D9:02:05:82:61,room3 7,F1:19:79:42:18:21,room4 8,CD:B1:31:A7:BB:F9,room2 9,F3:64:2A:58:FB:57,room8 10,F9:2A:AB:5A:2E:E3,room6	
31.5 Turn on	off Beacon Location	
Structure	BCE(n)	
F	n=0	Beacon off
Explanation	n=1	Beacon on
Example	BCE1	
Reply	Beacon loc is enabled!	
31.6 Beacon	Leave Home Alert	
Structure	Beaconalert(n)	
Evalenation	n=0	Beacon alert off
Explanation	n=1	Beacon alert on
Example	Beaconalert1	
Reply	beacon leave home alert enable.	
31.6 User lea	ves/at home alarm (EV-07B only)	
Structure	Homecheck(n)	
Explanation	n=0	Leaves/at home alarm off
	n=1	Leaves/at home alarm on
Example	Homecheck1	
Reply	Leaves/at home alarm on	
Alarm examplele	xxx left home. / xxx is at home now. GPS Loc! Now: Loc Time:11/10/2022 17:50:13 Alarm Time:11/10/2022 17:50:13 Speed:0km/h	

Altitude:7.6 Battery:98%

www.google.com/maps?q=22.6536583,114.0005850

G.32 Home Wi-Fi List

To set, add, delete and check Home Wi-Fi list.

32. Home Wi-Fi List			
32.1 Delete Ho	32.1 Delete Home Wi-Fi List		
Structure	WFD		
Reply	Delete home wifi list successful	ly.	
32.2 Automatic	cally Add Home Wi-Fi List		
Structure	WFA(coordinates),(location nam	ne)	
Explanation	coordinates	latitude,longitude	
Lapianation	location name	For example, home, office, garden	
To automatically	y add Beacons nearby, with RSS	I >80	
Example	WFA22.6535181,114.0009472,office		
Reply	Add successfully Home WiFi (mac address).		
32.3 Set Home	e Wi-Fi List		
Structure	WFS(coordinates),(mac1),(location name1);(mac2),(location name2);		
	coordinates	latitude,longitude	
Explanation	mac	Home WiFi mac address	
	Location name	For example, home, office, garden	
You can set only one location in one command, and you can set more than one Home Wi-Fi for one location			

Connect Shenzhen Eview GPS Technology			
Example	WFS22.6535181,114.0009472,f7:37:b7:10:81:ce,room1;E6:6F:80:A9:61:5D,room2		
Reply	home wifi list set OK.		
32.4 Check Ho	ome Wi-Fi List		
Structure	WFQ(n)		
Explanation	n	Check from Home WiFi (n)	
Example	WFQ1		
Reply	1,F7:37:B7:10:81:CE,office1 2,C4:9F:A6:15:24:3F,office2 3,D3:E3:AC:86:5E:46,office7 4,DF:19:ED:B3:63:4C,room1 5,DF:79:14:AF:36:87,room9 6,EA:D9:02:05:82:61,room3 7,F1:19:79:42:18:21,room4 8,CD:B1:31:A7:BB:F9,room2 9,F3:64:2A:58:FB:57,room8 10,F9:2A:AB:5A:2E:E3,room6		
32.5 Turn on/o	off Home Wi-Fi Location		
Structure	WFE(n)		
Explanation	n=0	Home WiFi off	
Lхріанаціон	n=1	Home WiFi on	
Example	WFE1	WFE1	
Reply	home wifi loc is enabled!		

G.33 TCP fast

33. TCP fast		
Structure	tcpfast(n)	
Explanation	n=0	n=1
Example	Tcpfast0	
Reply	Alert TCP fast off.	

G.34 Heart rate detect

Support EV-05 and EV-06

34. Heart rate detect		
Structure	hrs(n),(internal time)	
	n=0	Heart rate detect off
Explanation	n=1	Heart rate detect on
	internal time	Value range: 60~86400 seconds
Example	hrs1,60M	
Reply	Set no heart detect 60 minutes ok.	

G.35 Step detect

Support EV-05 and EV-06

35. Step detect		
Structure	detpedo(n),(internal time)	
Explanation	n=0	Step detect off
	n=1	Step detect on

V _E	Protect •
—	connect

	3,	
	internal time	Value range: 60~86400 seconds
Example	detpedo1,60M	
Reply	Set no step detect 60 minutes ok	

Back to Catalog

G.36 GEO fence detect

Support EV-04 and EV-05

36. Step detect		
Structure	detgeo(n),(internal time)	
	n=0	Heart rate detect off
Explanation	n=1	Heart rate detect on
	internal time	Value range: 60~86400 seconds
Example	detgeo1,60M	
Reply	Set GEO detect 60 minutes ok	

3. Particular SMS Commands

Particular Commands are only available in some product models, or some firmware versions.

P04 Particular in EV-04

P04.1 Change the Language_EV-04

Many languages are available in EV-04 and EV-05, supported by TTS robot-speaking tech.

Change language		
Model	EV-04	
Structure	Lo(language code)	

EV-04 Current Language List		
Target Language	Command	Reply
English-US	Loen-us	Set en ok.
French	lofr	Set fr ok.
Polish	lopl	Set pl ok.
Dutch	Lonl-nl	Set nl ok.
German	lode	Set de ok.
Chinese	lozh-cn	Set zh ok.
Chinese Yue-Hong Kong	lohk	Set hk ok.
Portuguese	lopt	Set pt ok.
Spanish	loes	Set es ok.
Italian	loit	Set it ok.
Japanese	loja	Set ja ok.
Turkey	lotr	Set tr ok.

P04.2 Alarm Speak_EV-04

You can send a message to device, then device can speak it as voice. This function is provided by TTS robot-speaking tech and supports many languages. Please, as the first step, change the language setting to the target language.

ALarm Speak		
Model	EV-04	
Firmware	Later than EV-04.8601.2110	
Structure	Alarm:(text)	
Explanation	text	Whatever you want device to speak
Example	Alarm:good morning	
Reply	Alarmspeak ok.	

P04.3 OTA Upgrade_EV-04

To upgrade OTA and check the OTA upgrade status.

OTA Upgrade			
Model EV-04			
P.8.1 To upgrade OTA			
Structure	fota		
Explanation	Receiving this command, device will download the OTA file from server, and automatically upgrade.		
Reply Fota received!			
P.8.2 To check OTA upgrad	de		
Structure	fotastatus		
Reply 1 update ok Target buildld:1638772748			
downloading progress:67% Reply 2 Target buildId:1638772748 check new version success! Started			
Reply 3	update failed Target buildId:1638772748		

P05 Particular in EV-05

P05.1 Change the Language_EV-05

Many languages are available in EV-04 and EV-05, supported by TTS robot-speaking tech.

Change language			
Model EV-05			
Structure	Lo(language code)		

EV-05 Current Language List				
Target Language	Command	Reply		
English-US	Loen-us	Set en ok.		
French	lofr	Set fr ok.		
Polish	lopl	Set pl ok.		
Dutch	Lonl-nl	Set nl-nl ok.		
German	lode	Set de ok.		
Chinese	Lozh-cn	Set zh-cn ok.		
Czech	Locs-cz	Set cs-cz ok.		
Portuguese	lopt	Set pt ok.		
Spanish	loes	Set es ok.		
Italian	loit	Set it ok.		
Australia	Loen-AU	Set en-au ok.		

P05.2 Heart Rating EV-05

Heart rating is only available in EV-05 and EV-06, as the watch has built-in heart-rate sensor.

Heart Rating				
Model	EV-05, EV-06			
Structure	hr			
Given 20 seconds, no matter heart rating succeeds or fails, SMS will be sent to indicate the status, as well as the TCP message to be sent to platform				
Measure Time:08/12/2021 18:48:26 Reply 1				
Reply 2	Measure Time:02/11/2021 09:43:40 Status: Failed			

Back to Catalog

P05.3 Turn on/off BLE Connection_EV-05

To turn on/off Bluetooth connection.

Turn on/off BLE Connection				
Model EV-05				
Structure	BLECONN(n)			
Fundamentian	n=0	Bluetooth connection off		
Explanation	n=1	Bluetooth connection on		
Example	BLECONN1			
Reply	BLE Connect on.			

P05.4 Message Display_EV-05

To display message on EV-05 watch main page.

Message Display				
Model EV-05				
Structue	Display(n),(text)			
Funlanation	n=0	Device will not beep		
Explanation	n=1	Device will beep		
Example	display1, Please don't forget to take your medicine!			
Reply	Message displayed!			

P05.5 Turn on/off Long Press screen to trigger SOS_EV-05

Turn on/off Long Press screen to trigger SOS				
Model	EV-05			
Structue	tttsos(n)			
Explanation	n=0	Long press screen to trigger SOS Off		
	n=1	Long press screen to trigger SOS On		
Example	tttsos0			
Reply	tttsos off.			

P07B Particular in EV-07B

P07B.1 Beacon V2_EV-07B

Beacon V2 allows one device to work with more than 20 beacons. Device will update available data of up to 5 beacons, as well as GPS, and Wi-Fi locations. Please check the Beacon V2 introduction for more details.

Beacon V2				
Model	EV-07BX			
Firmware	Later than EV-07BX.8601_2112	Later than EV-07BX.8601_2112		
Structure	Newbeacon(n)			
Explanation	n=0	Beacon V2 off		
	n=1 Beacon V2 on			
Example	Newbeaon1			
Reply	Beacon start new work mode.			

Appendix 1 Summary of Working Modes

Working	g Mode	Mobile network	Mobile data	Heartbeat	Interval	Call	SMS	Update location
Mode 1		Always on	Always on	Up to you	No	Anytime	Anytime	Only in events
	moving	Always on	Always on	Up to you	Yes	Anytime	Anytime	Events& interval
Mode 2	No-move	Always on	Always on	Up to you	Yes	Anytime	Anytime	Events & interval
	moving	Always on	Always on	Up to you	Yes	Anytime	Anytime	Events & interval
Mode 3	No-move	Always on	Always on	Up to you	No	Anytime	Anytime	Off
Mode 4		Always on	Events & Interval	Off	Yes	Anytime	Anytime	Events & interval
Mode 5		Off	Events & Interval	Off	Yes	Only SOS	Only SOS	SOS
	moving	Always on	Always on	Up to you	Yes	Anytime	Anytime	Events & interval
Mode 6	No-move	Always on	Always on	Up to you	Yes	Anytime	Anytime	Events & interval
Data-off Mode (Default Factory mode)		Always on	Off	Off	/	Anytime	Anytime	Off

Working Mode		GPS	Positioning methods of priority		
Mode 1		Only in events	BLE/Beacon→Home Wi-Fi→GPS→Wi-Fi & GSM		
Mada O	moving	Events & interval	BLE/Beacon→Home Wi-Fi→GPS→Wi-Fi & GSM		
Mode 2	not moving	Off	BLE/Beacon→Home Wi-Fi→Wi-Fi & GSM		
Mode 3	moving	Always on if no BLE/Beacon, marking every 100min	BLE/Beacon→Home Wi-Fi→GPS→Wi-Fi & GSM		
Wode o	not moving	Off	/		
Mode 4		Events & interval	BLE/Beacon→Home Wi-Fi→GPS→Wi-Fi & GSM		
Mode 5		SOS	BLE/Beacon→Home Wi-Fi→GPS→Wi-Fi & GSM		
Mode 6	moving	Events & Activated 3 minutes before interval	BLE/Beacon→Home Wi-Fi→GPS→Wi-Fi & GSM		
	not moving	Off	BLE/Beacon→Home Wi-Fi→Wi-Fi & GSM		
Data-off mode SOS /		/			

Appendix 2 Function List

Functions		ctions	Action	Scenario
1		SOS	Call, SMS, TCP alert, Continuous locate	Any emergency
2	Cellphone	Receive Call	ringtone	Like a cellphone
3		Call1	Call someone on contact list	Like a cellphone
4		GPS		Like a tracker
5	Positioning	Bluetooth	Provide location	Near Docking/Beacon
6		Wi-Fi&GSM		When no GPS/BLE
7		Fall alarm		When people fall
8	Sensor	Tilt alarm	Call, SMS, TCP alert	Coma, shock
9	Sensor	No motion alarm	Call, Sivio, TOP alert	Coma, shock
10		Motion alarm		Asset tracking
11	11 Overspeed Alert		SMS, TCP alert	Driving too fast
12	12 Low battery alert			Battery low
13	Geo fence			Leaving home/area
14	Power off ale	ert	SMS (EV-07B only), TCP alert	Turn off
15	5 Power on alert		TCP alert	Turn on
16		Home Wi-Fi		Come home
17	Home mode	Beacon	SMS, TCP alert	Come nome
18		Beacon fence alert		Come/leave home
19	19 Alarm clock		Voice	It's time to get up,do exercise, take medicine, sleep
20	20 Find me			I'm here
